D. Evaluation

50 cases generated 150 actual Chinese messages. Assisted review labeled **40 groups Pass**, **10 Needs edit** and **0 Fail**. Each group consists of the three candidates for one case. No separate message-level pass rate is claimed.

Results by scenario

Scenario	Cases	Pass	Needs edit	Fail
Birthday and festive greetings	8	6	2	0
Product recommendation	9	7	2	0
Post-purchase care	8	7	1	0
Reactivation	8	8	0	0
Event invitation	8	4	4	0
Price objection	9	8	1	0

Four simple checks

Check	Pass groups	Issue groups
Facts and boundaries	50	0
Scenario and context	50	0
Chinese expression	43	7
Three useful choices	46	4

Labels and review scope

Pass: all four checks pass. **Needs edit:** minor language or candidate-variation issues. **Fail:** material factual, boundary or task failures. Provider errors are technical failures and are not counted as successful generations.

All 150 messages were read against their supplied inputs in a Codex-assisted review. There was no independent advisor panel or real-customer study. A case can have issues in more than one check. The 40 passing groups are the cases not listed in the issue table on the next page.

The main remaining problems are long or scripted invitations and repetitive alternatives. Case I05 also copies a fictional-data label into customer-facing wording. The original messages remain unchanged in C_Test_Cases.xlsx.

D. Cases requiring changes

Case ID	Scenario	Issue
G02	Birthday and festive greetings	Output 2: '值此中秋' sounds formal for a newly established WeChat relationship.
G08	Birthday and festive greetings	Output 3: '向您送上一句问候' reads stiffly; use a simpler greeting.
R04	Product recommendation	Outputs 1–3: all repeat the same two boot features and a similar invitation to learn more.
R09	Product recommendation	Outputs 1–3: largely the same knitting detail and price; little useful variation.
A01	Post-purchase care	Output 3: '想关心一下您上周买的折线衬衫' remains awkward as a check-in.
I01	Event invitation	Outputs 2–3: event details remain packed into long sentences; output 2 has a stiff closing.
I03	Event invitation	Outputs 1 and 3: dense event sentences; output 2's closing sounds scripted.
I05	Event invitation	Outputs 1–3: copy '虚构的' into customer messages and repeat almost the same content. Remove the synthetic-data label from customer-facing wording.
I08	Event invitation	Outputs 1–3: very similar topic, time/location and invitation structure; alternatives add little choice.
P06	Price objection	Outputs 1–3: repeated '具体定价依据' is technical and stiff; use simpler everyday language.

Two supporting screenshots follow: browser captures of saved I05 and R04 case reviews. All labels refer to the original v2.1 outputs.

D. Screenshot evidence

Figure 1. Actual browser capture of the saved I05 review. The original messages copy the synthetic-data label into customer wording.

I05 - Saved evaluation record

Scenario: invitation | Prompt: veran_scenarios_v2.1 | Needs edit

Supplied input

Client: 虚构编号：F-I05
Recent chat: 客户：活动需要预约吗?
Product: 不适用 / 未提供
Context: 活动信息：名称：廓形体验日；日期：2026-11-22；地点：虚构的 VÉRAN 河岸店；参加条件：需要提前登记姓名和到店时段
本次任务：仅说明已知登记规则，不承诺预留。

Three original model outputs

1. 廓形体验日需要提前登记。登记时需提供姓名和到店时段。活动于11月22日在虚构的 VÉRAN 河岸店举行。

2. 需要提前登记姓名和到店时段。廓形体验日在11月22日举行，地点是虚构的 VÉRAN 河岸店。

3. 参加廓形体验日需要提前登记，提供姓名和到店时段。活动日期是11月22日，地点在虚构的 VÉRAN 河岸店。

Run ID: 20261107T083321Z-af3fde97. Browser capture of saved records; no new model generation.

Figure 2. Actual browser capture of the saved R04 review. Three candidates repeat the same two product features.

R04 - Saved evaluation record

Scenario: recommendation | Prompt: veran_scenarios_v2.1 | Needs edit

Supplied input

Client: 虚构编号：F-R04
Recent chat: 客户：有没有日常能穿、又有点特别的靴子?
Product: 名称：折角短靴；设计：方头，侧拉链；价格：人民币 5,800 元
Context: 无

Three original model outputs

1. 这款折角短靴是方头设计，侧面有拉链。您可以看看是否感兴趣。

2. 您提到想找日常穿、又有点特别的靴子。这款折角短靴有方头和侧拉链，您觉得这样的设计怎么样?

3. 可以考虑这款折角短靴，设计上有方头和侧拉链。您想了解更多的话，我再为您介绍。
