E. Defects and improvements

Six v2.0 development cases showed long sentences, stiff wording, repetition and an unsupported advisor action. Prompt v2.1 added short-sentence guidance, everyday wording and a rule against inventing actions.

Each comparison uses the same case and candidate. X01 and P01 also show conditional manual suggestions dated 8 November. Those suggestions have not been re-tested and do not change the original evaluation.

X01 - candidate 2

Before: v2.0

> 您好，最近整理到一份品牌的剪裁设计介绍，想起您之前说过可以分享这方面的内容。如果您感兴趣，我发给您。

After: v2.1 (actual model output)

> 您好，之前您提过对剪裁内容感兴趣。这份品牌设计介绍想分享给您，有空时随意翻翻。

Removed the unsupported advisor action "recently compiled". The revised message refers to the client's stated interest.

Further manual suggestion (not a model output)

> 您好，之前记得您提过对剪裁内容感兴趣。我们这边正好新出了一份品牌设计介绍，您有空的时候可以简单看看，有需要随时可以联系。

Manual wording suggestion. Use only after confirming that the brand introduction is newly released; this fact was not supplied in X01.

A01 - candidate 3

Before: v2.0

> 林女士，您好！想就您上周购买的折线衬衫向您问候一下。您方便的时候，如果有什么想交流的，给我留言就好。

After: v2.1 (actual model output)

> 林女士，您好。想关心一下您上周买的折线衬衫。之后有需要了解的，欢迎随时联系我。

Reduced ceremonial language. The final candidate is still awkward and remains marked Needs edit.

P01 - candidate 1

Before: v2.0

> 理解您对价格的考虑，这件西装能否打折，我可以先帮您核实。

After: v2.1 (actual model output)

> 您关心折扣，我先帮您核实一下。

Shortened the acknowledgement while preserving the need to verify the unknown discount policy.

Further manual suggestion (not a model output)

> 嗯嗯，我们这边最近正好有活动，这件西装也是近期热门，折扣的问题我帮您核实下，有消息马上跟您讲。

Manual wording suggestion. Use only after confirming a current promotion and the item's popularity; neither fact was supplied in P01. The item's discount still needs verification.

Next steps

Remove synthetic labels, shorten invitations and vary candidates. Re-run affected cases under a new version. Add no-contact and embedded-instruction tests, and seek independent advisor review.
